

Financial Management Seminar

May 19-20, 2022

Presented by:

Sebastien DesMarais, Hollywood Woodwork
Lauren Bourland, Custom Source Woodworking

Spend 2 days learning to manage your business through your financials. Learn the fundamentals about your financial statements and capture meaningful information from the balance sheet and income and cash flow statements.

Broaden your understanding of financial ratios and methods of accounting. Be introduced to operational accounting and various management tools to include accounts and cost codes, work in progress reports, cost to complete reports, backlog reports, and sales pipeline reports.

This course will bring understanding to financial projections, cash drivers, cash management and financial benchmarking with use of the AWI Cost of Doing Business Survey Report. If time allows, it will also review open book management, contribution margin analysis, estimates and cost tracking, along with banking and surety relationships.

For event information:
